Organization Description:

The Alternative Education Resource Organization (AERO) was founded in 1989. AERO is considered by many to be the primary hub of communications and support for educational alternatives around the world.

AERO's mission is to help create an education revolution to make student-centered alternatives available to everyone.

Towards this end, AERO provides information, resources and guidance to families, schools and organizations regarding their educational choices on topics such as: homeschooling, public and private alternative schools, and charter schools.
